PROFESSIONAL SUMMARY

Results-driven Frontend & MERN Stack Developer with 1.5+ years of hands-on experience building full-stack web applications using latest tech stack. Demonstrated ability to design scalable REST APIs, implement secure authentication. Built an AI-powered resume screening platform as a Final Year Project, integrating NLP models and leveraging AI to enhance HR experience.

TECHNICAL SKILLS

Frontend & Backend: ReactJS, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), NodeJS, ExpressJS, NestJS

Databases: MongoDB, MSSQL

Tools & Platforms: Git, GitHub, REST APIs, SonarQube, VS Code, Google Cloud Console

AI & Data: NLP (spaCy), Machine Learning (Basics), Computer Vision

EXPERIENCE

MERN Stack Developer Intern — 10Pearls Pakistan

Dec 2025 – Mar 2026

- Developed a full-stack Notes Management Application using the MERN stack, enabling efficient task tracking and improving user productivity.
- Designed and implemented CRUD functionalities and responsive UI components, improving usability by 40%.
- Performed unit and integration testing using Jest, Mocha, and Chai, identifying critical bugs early and reducing production errors by 65%.

Frontend Developer Intern — Internship Pakistan

Jul 2025 – Oct 2025

- Developed responsive job listing and application pages using React.js.
- Collaborated with functional teams in an Agile development environment and improved team productivity by 20%.
- Participated in code reviews and version control using Git, enhancing code quality and reducing errors by 45%.

PROJECTS

Recruit AI — Final Year Project | Python, MERN Stack, Google Cloud Console

- Developed an AI-powered resume screening web application using the MERN stack, automating candidate evaluation and improving shortlisting efficiency by 75%.
- Trained a custom Named Entity Recognition model using spaCy transformers to extract structured candidate data.
- Built a job description matching system to align resumes with job postings, reducing manual screening by 50%.

Notes Management Application | MERN Stack, Tailwind CSS

- Built a full-stack MERN application for notes and task management with secure user authentication.
- Designed RESTful APIs and implemented CRUD operations with comprehensive unit and integration testing.

Time-Off Microservice with HCM Integration | Nest JS, Postman, SQLite

- Developed a backend microservice for employee time-off management with automated leave validation.
- Implemented simulated HCM integration with fault-tolerant fallback mechanisms and batch synchronization.
- Designed a modular NestJS architecture using TypeORM and SQLite, focusing on scalable backend design.

Team Task Manager | PostgreSQL, Postman, React JS, Passport JS, Tailwind CSS

- Developed a full-stack team collaboration platform supporting task assignment, team management, and workflow tracking for 50+ concurrent users.
- Built dynamic dashboards and task monitoring features that streamlined project coordination and reduced manual workflow tracking effort by 60%.
- Designed and integrated 15+ RESTful API endpoints and secure session-based authentication.

EDUCATION

Bachelor of Science in Software Engineering

2022 – 2026

Iqra University Main Campus, Karachi, Pakistan
